# Wyndham Offices, Lahaina, HI

Located on the coast line of Maui, these Wyndham Offices operate as a sales force for vacation time-shares. The property hosts many different retail and commercial companies and restaurants.

**Design Challenge**

The building has limited space in the ceilings and required either ductless or slim duct models to achieve space cooling. Use of several compact cassettes and slim duct models were used along with a few high and medium static units.

**Why Fujitsu Was Chosen**

Fujitsu was chosen based on its longstanding relationship with the mechanical contractor, Southshore Air Conditioning, as well as the need to save energy and have a quiet atmosphere for sales.

**The Results**

The units were installed quickly and efficiently. Energy savings and quietness were key factors and were easily achieved.
